

## New technologies and greater governance.

The Transport industry is a highly regulated one; it is also an industry which is facing massive change from technologies such as electric vehicles, autonomous vehicles and drones. Many organisations are in transition, with new technology disrupting existing business models and increased demand for greater transparency and stronger governance.

Transport is also a highly competitive industry and there is no doubt that organisations who are best able to re-skill for, and harness, these new technologies will gain major competitive advantage.

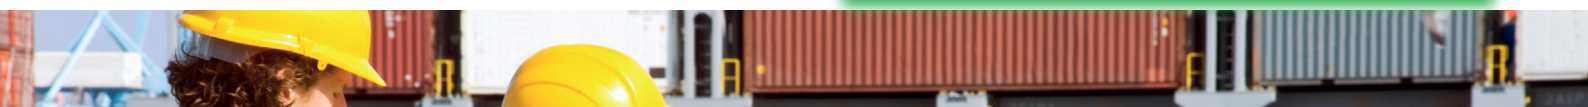

With increasing globalisation and competition there is mounting pressure for organisations to do more with less, particularly with lower staffing. This is driving the need for greater staff engagement and effectiveness which requires more and better focused training.

Tutis solutions can help with re-skilling the workforce and meeting all the compliance requirements around the new technologies, ensuring staff have the skills to safely and efficiently perform their roles, and also to provide the transparency to demonstrate to internal and external stakeholders.

**Tutis cloud based solutions are delivered as a managed service ensuring you have a skilled, safe and effective workforce.**

Tutis workforce capability and skills compliance solutions for the Transport industry include:

- Workforce agility and skillset management
- Remote, pre-site inductions
- Staff and contractor onboarding
- Tablet-based (iPad), paperless forms, including electronic signatures for processes such as toolbox meetings
- Knowledge and skills assessment
- Learning management
- Fully visible and auditable training records
- Compliance with regulations, industry standards, corporate policies, strategic alignment, and community standards
- Continuous improvement and integration with existing systems
- Issue management and incident management.

Tutis workforce capability and skills compliance solution for the Transport industry delivers 4 pillars of assurance (key benefits):

I 1. Managed Compliance Risk

I 2. Reduced Complexity

I 3. Optimised Running Costs

I 4. Delivered Paperless

### Transport Example

Use Tutis to get new staff and contractors up-to-speed quickly on new technology and methods, equipment and safety processes and procedures, and corporate policies, by conducting remote, pre-site inductions. Monitor compliance through extensive use of mobile devices (e.g. iPads) to complete forms on-the-go. Monitor skills currency through automated refresh alerts and gate access control.
